Edit

Bug Report:

The wins are not being added correctly. It doesn't matter if you win or lose the points always get added to the losses.

Steps to Reproduce:

Start up the app

Click on draw

Pick your two bots that you think will win

Click duel

Try until you win

If you win you should see a point added to the losses section instead of the wins

Expected:

When you win the point should be added to your win total

Actual:

Wins are being added to the losses total instead

Notes:

The notification saying you won still appears correctly just the points are being added incorrectly
